

## Zero Carbon Calculator Emissions Data

Go to the carbon calculator and select reports you can export your emissions data to excel, example below, then upload this document to the QIT portal against Carbon Emissions Data

The screenshot shows the 'Carbon Calculator' interface. On the left is a navigation menu with options: Home, Help Guide, Your Footprint, Questionnaire, Reports, Emissions Data (highlighted), and Charts & Breakdown. The main area displays a table of emissions data with columns for Scope, Functional Area & Category, GHG Category, Emission Source, How much did you use?, Unit, and tCO2e. The table contains six rows of data.

Scope	Functional Area & Category	GHG Category	Emission Source	How much did you use?	Unit	tCO2e
Scope 3	Fuel and energy-related activities	3. Fuel and Energy Related Activity	Fuel and Energy Related Activity - Electricity	37,276,488	kWh	2,524.97
Scope 3	Energy, Water & Property	Fuels	Natural Gas	10,004,782	kWh	1,041.07
Scope 3	Goods not for resale	3. Purchased Goods & Services	Operational Spend	25,417,280	£ expenditure	895.25
Scope 3	Capital goods	2. Capital goods	Capital Expenditure	936,087	£	476.83
Scope 2	Energy, Water & Property	Electricity Location-based	Electricity - Unknown source	1,746,196	kWh	381.89
Scope 2	Fuel and energy-related activities	3. Fuel and Energy Related Activity	Fuel and Energy Related Activity - Gas	10,004,782	kWh	304.66
